Subject: Microsoft settlement

Microsoft has provided a user friendly enviornment for computer users, I fail to understand why the government must intervene in any business that is successful.

America was supposed to be a Republic, a free enterprise. However, with the Socialist attitude of many, those that do succeed are frowned upon. Microsoft should be allowed to carry on their business as a business without unnecessary government intervention. Microsoft has paid a price for the success they have.

Let them continue. Others can have success but they do have to pay a price and a lot of work to get there. I feel Microsoft has paid their dues and should be allowed to continue. The states that want more should not be allowed to proceed with their arguments.
